

Air-operated 4,500 lb sliding bridge jack

Supports wheel and brake service by lifting one vehicle end off the runways. Requires a compatible compressed-air supply.

Confirm runway support span and rail profile. Minimum lifting height is 4 3/4 inches. Requires compressed air and suitable clearance beneath the vehicle.

Accessory rating: 4,500 lb. This rating does not increase the lift rating.

Included equipment and standalone accessory versions can differ. Confirm the exact model and supplied configuration before ordering.
